DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(e) the invention was described in a patent granted on an application for patent by another filed in the United States before the invention thereof by the applicant for patent, or on an international application by another who has fulfilled the requirements of paragraphs (1), (2), and (4) of section 371(c) of this title before the invention thereof by the applicant for patent.

2. Claims 1,4,6-13,16-19,21-23,26,28-33,36-38,40,42,43,46-53 are rejected under 35 U.S.C. 102(e) as being clearly anticipated by Rapoport(5957934). Note col. 2, lines 35-68, col. 3, lines 1-30, col. 4, lines 10-26, col. 5, lines 18-30 and 50-68, col. 6, lines 35-55, col. 7, lines 20-35, col. 8, and col. 9, lines 5-20.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claims 2,3,5,14,15,20,24,25,27,34,35,39,41,44,45 are rejected under 35 U.S.C. 103(a) as being unpatentable over Rapoport(5957934).

Rapoport(5957934) teaches the claimed invention including the use of either an MR imaging system or a CT imaging system in association with the guide system.. Rapoport(5957934) does not teach the use of radio-opaque or non-ferromagnetic fiducials or a reflector for directing the laser light.

Art Unit: 3737

The use of radio-opaque or non-ferromagnetic fiducials or a reflector for directing the laser light are well known in the art and therefore in the absence of a showing of criticality are obvious matters of design choice.

Conclusion

5. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
